

AES Encrypted

- AES is a secure way to lock and unlock data using a secret key.
- យើងមាន Key ហើយយើងធ្វើការ encrypt បន្ទាប់មកយើងត្រូវធ្វើការ decrypted ឡើងវិញដោយប្រើប្រាស់ Key នឹងវិញ
- AES is commonly used in Spring Cloud Config Server to protect sensitive configuration value like passwords and API keys!
- it is working with spring cloud config server

1- In the config server (application.yaml)

```
11 server:
12   port: 8888
13 spring:
14   application:
15     name: configserver
16 # 1. Activate the jdbc profile here
17 profiles:
18   active: jdbc
19 datasource:
20   url: jdbc:mysql://localhost:3306/configdb
21   username: root
22   password: admin
23   driver-class-name: com.mysql.cj.jdbc.Driver
24 cloud:
25   config:
26     server:
27       jdbc:
28         sql: "SELECT PROP_KEY, PROP_VALUE FROM PROPERTIES WHERE APPLICATION = ? AND PROFILE = ? AND LABEL = ?"
29         default-label: main
30 encrypt:
31   key: "LONGVIBOL123"
```

2- How to get encrypted

 Udemy-Microservice > encrypt > encrypt

POST http://localhost:8888/encrypt

Docs Params Authorization Headers 10 Body Scripts Settings

☐ none ☐ form-data ☐ x-www-form-urlencoded ☒ raw ☐ binary ☐ GraphQL JSON 

1 Database-Development-Build SERVER DB

- We use : {cipher} ប្រាប់ថាវា encrypted

{cipher}ebd3d8e6e6c336f733f5f3a5737cb1217050424d14989f8ec607e000fbf94718f260a247d2f788c9b8c2b
dd6dd6a9c8470da486b11093ef0a8ffe841d36a3479

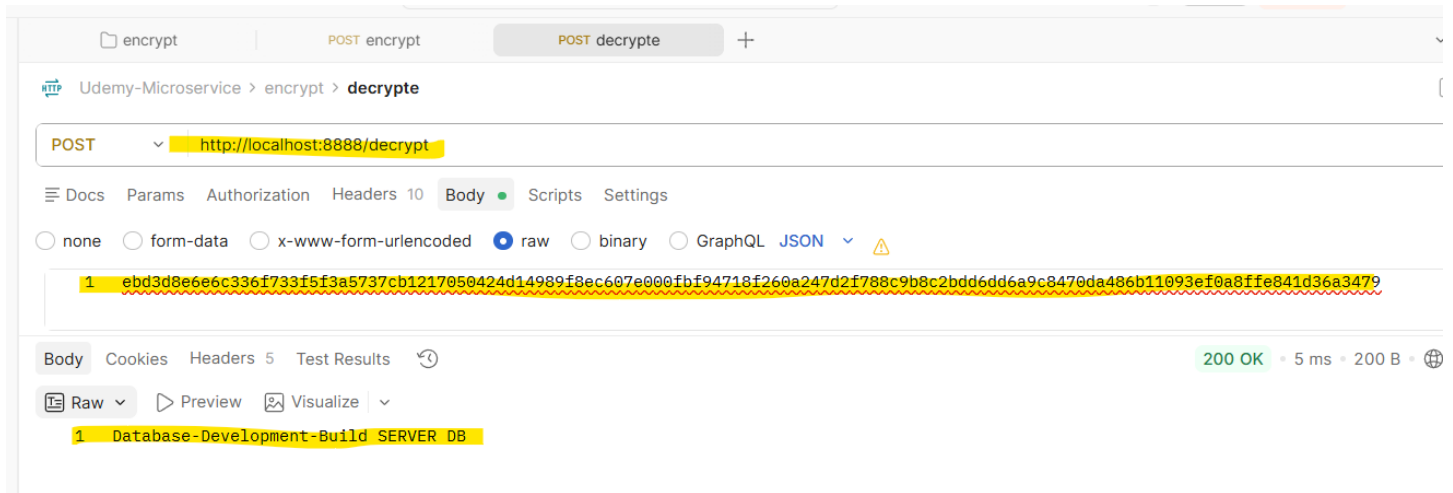

POST http://localhost:8888/encrypt

Docs Params Authorization Headers 10 Body Scripts Settings

Headers 9 hidden

Key	Value	Description
☒ Content-Type	text/plain	
Key	Value	Description

- When decrypted

```

10
11server:
12  port: 8888
13spring:
14  application:

```

```

2026-06-16T14:56:53.348+07:00 INFO 29964 --- [configserver] [nio-8888-exec-1] com.zaxxer.hikari.pool.HikariPool : HikariPool-1 - Added connection
com.mysql.cj.jdbc.ConnectionImpl@7d257e48
2026-06-16T14:56:53.350+07:00 INFO 29964 --- [configserver] [nio-8888-exec-1] com.zaxxer.hikari.HikariDataSource : HikariPool-1 - Start completed.
2026-06-16T15:01:38.777+07:00 INFO 29964 --- [configserver] [nio-8888-exec-2] o.s.c.c.s.e.EncryptionController : Encrypted data
2026-06-16T15:01:57.195+07:00 INFO 29964 --- [configserver] [nio-8888-exec-6] o.s.c.c.s.e.EncryptionController : Decrypted cipher data

```

In the spring cloud it will do this AES

- We can save the

encrypt:

key: "LONGVIBOL123"

or we can use the variable to the spring boot
